Skneedles®

High performance machine needles
and precision components

skmachineneedle@gmail.com

 +82 10-9996-1199

SKneedles® produces high quality industrial machine needles, precision components as well as machines and services for the manufacture. SK inherits Korea's 50-year needle manufacturing technology and provides products that satisfy customers with the best quality and service.

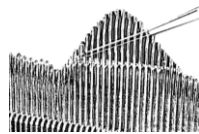

▪ **Guarantee of quality**

Technical treatment in heating process have knitting needle's hook part withstands a huge tensile force

Latch seat soften the repeated impact force as well as ensuring smooth movement of latch

Comprehensive polishing process on hook & latch part ensures smooth thread transfer from in to out of hook part without any blockage

Reinforced riveting process enables consistent and long lasting latch movement

SKneedles located in the south eastern territory of South Korea, named “South spring” where the birthplace of the knitting needle industry in South Korea since 1960s

SYSTEM PARTS

CIRCULAR

KNITTING MACHINE NEEDLES

PRIME offers over 10,000 high-performance circular knitting machine needles covering most sort of length and thickness and machine system parts. Machines are offered with typical diameters from 3.5 to 6 inches, needles with a thickness from 0.26 mm to 1.55 mm are employed depending on the gauge.

Industrial circular knitting machine

Applications to manufacture T-shirts, sportswear, underwear, sleepwear, technical textiles and applicable to other very wide textile range

▪ Knitting machine needles

Vo, Vosa, Vota	Latch needles with one butt
Wo, Wosa, Wora	Latch needles with two butt
Deha, Bera etc.	Latch needles of wire type

▪ System parts

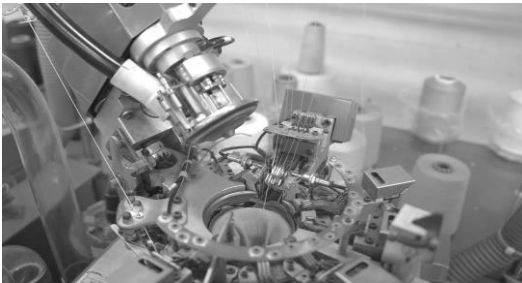

SNK	Sinkers
AT	Selecting jack
KT	Coupling part
NT	Intermediate jack
ZS	Press jack

HOISERY

KNITTING MACHINE NEEDLES

PRIME offers over 1,000 high-performance hosiery knitting machine needles for the production of socks and stockings and also supplies machine system parts

Industrial hosiery knitting machine

Application to manufacture leg wears, functional socks, stockings and sports elastic span textiles

▪ Knitting machine needles

Hofa, Hofasa	Latch needles designed for sock manufacture
Vo, Vosa	Latch needles with pre-bend, designed for sock manufacture
Vo-,Vora-,Vosa-, Vosara-Spec.	Punched latch needles with transfer part
Links	Latch needles both end hooks for double cylinder machines

▪ System parts

SNK	Sinker (=holding-down/knock over sinker)
AT	Selecting jack
KT	Coupling part
UT	Transfer jack
ZS	Intermediate jack
SPT	Separator
PHT	Terry sinker

FLAT

KNITTING MACHINE NEEDLES

PRIME develops and produces high performance flat knitting machine needles , PRIME flat needle provides a great stitching quality with the high elasticity and durability

Industrial flat knitting machine

▪ Latch needles

Vosa-Spec. 89.68 007

Vosa-Spec. 89.75-64 044

▪ Spring loaded latch needles

Vosa-Spec. 112.70-62 008

Vosa-Spec. 112.88-75 012

▪ Compound needles

SN-M 100.90-80 001

SN-M 100.68-53 002

Applications to manufacture pullovers, collars, gloves, knitted shoe uppers

WARP

KNITTING MACHINE NEEDLES

In warp knitting machines, the broad scope of application in production generates a lot of very different machines. PRIME provides diverse needles and system parts apply to such a large number of different machines

Industrial warp knitting machine

Application to manufacture outerwear, underwear, shoe uppers and different types of lace for women's wear, industry textiles, geotextiles, medical textiles

▪ Warp knitting machine needle

Raschel ,	Latch needle embedded on raschel machines
Raschel-Spec.	
Spec.	Needles for warp machines and raschel machines

▪ System parts

LN	Guide needle
MB	Loop forming part
NT	Holding-down part
RT	Reed part
Spec.	Closing element
SNK	Warp sinker

Order Plan

Needle code#	Q'ty / pcs	Customer	Contact	Machine builder	Machine name	Remarks
